Student View: Entering Permission Numbers to Register for a Course in PAWS

Instances where a student would need to enter a permission number to register are as follows:

- A course that is set up to require department or instructor consent
- The course is not set up for Student Specific Permissions
- A section that is full (and has permission from the instructor to register)
- The student does not meet course prerequisites (and has permission from the instructor to register)

Once the student has searched for the course, they will see the following page:

**Note: The box to enter a permission number will not appear if permission is not needed in order to register**
